DETAILED ACTION

Page 2

Response to Arguments

Applicant's arguments filed 2/03/2005 have been fully considered but they are not persuasive. Lim et al. disclose a thin film transistor array substrate for liquid crystal display and a method for fabricating the same where in Fig. 9, two storage capacitors "M" and "N" are disposed between gate line 206 and capacitor electrode 216 formed above the gate line 206 where the gate line 206 is connected via contact holes 209 and 211 and connecting electrode 219 passing through storage capacitors "M" and "N" to the capacitor electrode 216.

Allowable Subject Matter

- 1. Claims 12-19 allowed.
- 2. Claims 2-11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claim 1 rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (6,448,579)

Application/Control Number: 10/024,178

Art Unit: 2826

Lim et al. disclose a thin film transistor array substrate for liquid crystal display and a method for fabricating the same where in Fig. 9, two storage capacitors "M" and "N" are disposed between gate line 206 and capacitor electrode 216 formed above the gate line 206 where the gate line 206 is connected via contact holes 209 and 211 and connecting electrode 219 passing through storage capacitors "M" and "N" to the capacitor electrode 216

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 10/024,178

Art Unit: 2826

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The

examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
